

Bellerbys College – Another Year of World Class Results Meet Some of our successful students

NST 18 Oct 2006

Bellerbys College is proud to announce another hugely successful year in the performance of their students in the A-Level and Foundation results.

Nigel Addison, Senior Principal, says “ From London and Brighton to Oxford and Cambridge, international students studying with us have surpassed the national average and achieved academic results which can only be described as exemplary.”

We profile three international students from China, Ukraine and Philippines whose outstanding achievements make Bellerbys a preferred choice for students from many other countries as well as Malaysia. At Bellerbys, you will find a global mix of ambitious students who look to Bellerbys for the academic preparation for entry into top UK universities. We are proud to record that we are a truly international college, with students from 120 countries.

Tang Jing from China speaks of her experience, *"I like to do subjects from both humanities and sciences because I think it keeps my options open. I think I'll go on to graduate studies in Corporate Law. I have special lessons here too where I'm encouraged to talk about current affairs. There are so many international students here at Bellerbys. I think it's a great way to learn about other cultures around the world; their views are very different and interesting. I'm really enjoying it all."*

Tang Jing went on to achieve an outstanding six A grades at A Level in Biology, Chemistry, Chinese, Economics, History and Pure Mathematics. She will take up her place at Cambridge University in September to read Law.

Dmitriy Myelnikov from Ukraine says of Bellerbys, *"I'm really enjoying the teaching here. I think in a way, Bellerbys has broadened my horizons. I'm looking at a career in some pharmaceutical industry; maybe biotech. They basically use cutting-edge discoveries in technology to produce better medicines and crops. I had specialist preparation at Bellerbys, particularly with the application process."*

Dmitriy achieved an equally impressive 5 A grades in Biology, Chemistry, English Literature, Physics and Pure Mathematics. Dmitriy will also join Cambridge University and will now read Natural Sciences.

Abigail Guillermo from Philippines recalls her experience at Bellerbys, *"When I came to Bellerbys College I didn't know as much about my subjects, but since my grades have improved, my confidence in the classroom has really grown. I enjoy my Chemistry lessons the most because the teacher is so passionate about what he's teaching and he's passed that on to me. Abigail Guillermo went on to achieve AAA and is now heading to Oxford University to study Chemistry and Management.*

In addition to the above, Lim Hong Sheng from Malaysia has been accepted into Cambridge University to study Natural Science. Lau Ting Hui has earned a place at Cambridge to read Land Economy. Chung Sze-Ryn who will be taking up the Medicine offer from Royal College of Surgeons in Ireland.

Bellerbys College offers Oxbridge and Medical School preparation at no extra charge to the best students on our A Level Programme.

Our Foundation students have fared just as well. Foundation students achieving 75% and above have gained entry into the universities of Lancaster, Bath, Nottingham, Manchester, Loughborough, Cardiff and University College of London for degrees in business, accounting and finance, management, banking and international business.

This is the time of the year when parents are preparing to place their children overseas after the SPM. Bellerbys continues to surpass each year of its academic achievement. We invite you to consider a trusted name in preparing your son or daughter for university education.

Students may apply now with forecast results for the Jan 2007 Intake. Partial scholarships are offered to suitably qualified candidates to assist them to have the opportunity of the Bellerbys Experience. There is also the Friendship Fund for students choosing the Cambridge centre as their preferred centre.
