

Taylor's College Australia Feature for NST 16-10-05

The MOST EFFECTIVE, DEDICATED PATHWAY TO THE UNIVERSITY OF SYDNEY.

In welcoming international students to the Sydney Foundation Program the Vice-Chancellor and President of The University of Sydney, Professor Gavin Brown, said as Australia's oldest university, we are proud of our history and our reputation for comprehensive teaching and research excellence. At Sydney we have always welcomed students who aspire to come here from all over the world. You will find that many challenges await you. Meeting the rigorous academic standards needed for your studies and adapting to the culture of study in an Australian university requires thorough support and guidance.

The University of Sydney Foundation Program (USFP) has been designed specifically by Taylor's College Australia to prepare students like you for our undergraduate courses – and wider university life. The program, offered in partnership with Taylor's College, provides an excellent and guaranteed pathway to university so long as the minimum prescribed grades are met.

By undertaking this program you would have the advantage to join many other motivated and talented students in a safe and conducive learning environment. You will have the opportunity to truly enjoy the benefits of the best all round experience of any university in Australia.

The University of Sydney and Taylor's College have worked closely together to create the University of Sydney Foundation Program. Together, we have developed a program which is most effective path to a place at the University or at an Australian university of your choice.

Once you have successfully completed the program you have two major advantages. Firstly, you have a guaranteed place at the University of Sydney. Secondly, you can be confident that you have received the very best possible preparation for a degree at the University of Sydney. Small classes of 15 students, free tutorials and individual Study Guides are some of the key attributes of ensuring Taylor's students succeed.

Taylor's College have also effectively gone into partnership with other G-8 Universities in Melbourne and Perth. In Melbourne the Monash University Foundation Year (MUFY) tracks you into Monash University once you complete your program successfully with the right scores. The other advantage you have is that the MUFY program is accepted by other major Universities and the choice of location in Australia is in your hands.

In Perth Taylor's College has now relocated its Foundation Year for the University of Western Australia (FYUWA) within the UWA campus thus giving the students full direct access to all facilities available at this prestigious University. Since this program commenced in 1977 an average of 95% of students have successfully gained entry to university and 92% have received an offer for their first choice.

Students will also have the choice of living in the University of Western Australia student hostel, Currie Hall, that has tennis courts, a gymnasium, library, computer room and a regular shuttle bus that will transport Taylor's students to and from the hostel to the Taylor's campus regularly throughout the day.

Taylor's College Auckland is considered the University preparation specialist. The Foundation program Taylor's Auckland offers gives the students who successfully complete the course direct entry into the University of Auckland and the Auckland University of Technology and is recognized by all New Zealand Universities and leading Australian Universities such as the University of Western Australia.

Taylor's College has been at the Cutting Edge of education since 1920 and its unique approach has made it Australia's and New Zealand's leading university preparation college.

Mr Kelly Smith and Mr Lester Khoo, Marketing Manager of Taylor's Australia invite parents and students for interviews for the January 2006 Term on 20-25 October at the offices of JM Education Counselling Centre in Penang and Subang Jaya.
